Casual pouch and key strap made with Kojima denim texture, which are manufactured in Betty Smith - Japanese denim manufacturer. These products use real denim texture and jeans making methods, so you can enjoy the aging.

Kurashiki where our head office locates is called "City of Textile" and the yearly shipment value in textile industry is the highest in Japan. Especially Kojima is known as the birth place of domestically manufactured jeans. In 1962, Betty Smith has been established in this place as the first domestic company of lady's jeans. The company continues to manufacture high quality Japanese jeans in Kojima.
