4B11 Lancer Evolution X

■ 4B11 Capacity up 2300KIT

Defric coating (Lubricous film) is applied to the piston skirt, for a reduction in friction and loads as well as improved durability.

KIT contents

- ① TODA Forged Piston KIT (φ86.50mm/φ87.00mm)
- ② SPL crankshaft (long stroke · high accuracy dynamic balanced)
- ③ I section chrome molly connecting-rods (Fully floating with Bush & Balanced)
- ④ Connecting-rod bearings (black metal is used · bearing clearance has been adjusted)

Lancer Evolution X / 2300 capacity up KIT for 4B11 is released.

By increasing engine displacement volume, this product can improve base power (particularly torque) through the whole performance range. Designed to prevent the pistons top land from breaking down under high boost conditions.

The high durability Black Metal is used for a connecting rods bearings.
